

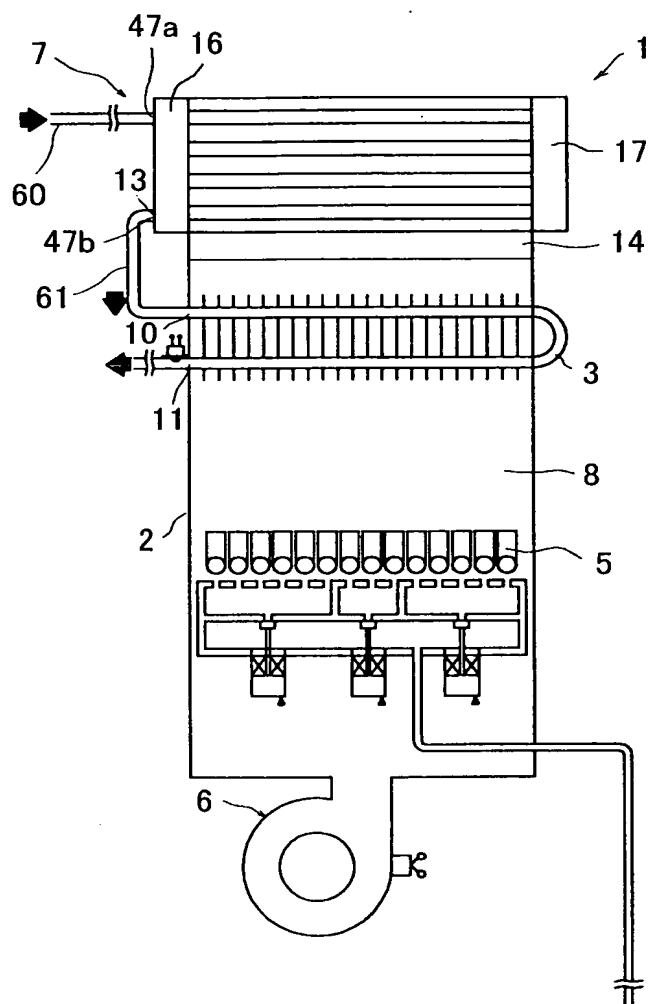

FIG. 1

This diagram shows the exploded perspective view of the container assembly. It includes the base container (2), the intermediate container (14), and the top container (15). The intermediate container (14) is shown with a dashed arrow indicating its upward movement into the base container (2). The top container (15) is shown with a dashed arrow indicating its downward movement into the intermediate container (14). The top container (15) has a lid (17) and a side panel (15a). The intermediate container (14) has a side panel (14b) and a top edge (14c). The base container (2) has a side panel (2a) and a bottom edge (2b).
